- Red (RD)
- Light Blue (LB)
- Beige (BG)
- Navy (NY)
- Yellow (YL)
- Mauve (MV)
- Hammer Tone Green (H-TOG)
- Hammer Tone Gray (H-TOG)
- Hammer Tone Blue (H-TOB)
- Teal (TL)
- Burgundy (BU)
- Light Gray (LY)
Features and Benefits
Restricting access and key control are major issues anesthesia departments with JCAHO compliance. Now Harloff combines modern keyless security technology with functional and attractive storage cart.

- Meet or exceed all current JCAHO recommendations for the storage and transport of Anesthesia department supplies.
- Advanced Programmable Electronic Proximity Locking system uses cards, card tags, or numerical entry codes to give multiple choices for access. To gain access, the user either presents their card or enter a PIN number.
- Up to 1,000 transactions can be stored in the unit. An optional printer can print transaction log including date, time, and user.
- Keyed master lock can over-ride the electronic lock for emergency access.
- On board rechargeable power supply with recharge warning light and built-in battery saver.
- All-aluminum construction for lighter weight and durability.
- Side storage cabinet with flexible storage system for supplies or manuals.
- Full extension ball-bearing drawer slides.
- Full wraparound bumper on extended stabilizing base.
- Pull out stainless steel shelf.
- Plastic replaceable top with integrated push handles.
- 5” Sealed ball bearing casters, one directional and one braking offered.
- 31” of vertical drawer space with 2 standard drawer configurations offered. Custom drawer configurations are available.
- Full range of drawer sizes, drawer organizers, and cart accessories to meet unique department requirements.

MR Safe Accessories Included:
- Raised back rail system - 3 tier
- Side rails (4)
- Full size drawer trays with adjustable dividers (2)
- Hospital grade 6 socket outlet with 15’ cord wrap
Malignant Hyperthermia Cart, Standard Package

Features and Benefits

- Some patients under anesthesia experience a sudden and dangerous rise in blood temperature, a condition called Malignant Hyperthermia (MH). Healthcare facilities that administer volatile inhalational agents known to trigger MH must have emergency equipment immediately available for the treatment of MH (Accreditation Association for Ambulatory Care). Surgery centers must have immediately available, and in an organized cart, all items required for treatment of MH (American Society of Anesthesiologists and the American Association of Nurse Anesthetists).
- The Harloff Malignant Hyperthermia Cart will demonstrate JCAHO compliance and/or best practice for all OR suites, Level 1 Trauma Units, Surgery Centers, and Ambulatory Facilities.
- Cart includes: integrated 1.6 cu ft refrigerator/freezer with hospital grade plug, 10 glycolpacks, LED illuminated digital thermometer with cart power safety feature, 3” and 6” storage drawers, stainless steel breakaway locking system on both the refrigerator and the two storage drawers, full wrap-around vinyl bumper on separate steel frame, ball-bearing full extension drawer slides, removable plastic top, 5-inch premium wheels with one brake and one tracking caster, powder coat finish in 12 colors.
- The cart increases patient safety and departmental efficiency by providing a convenient, portable and economic solution for storage and transport of cooled glycol packs, cold saline IV solutions, and dantrolene (Dantrium) used to stabilize MH. Cart can hold critical MH emergency supplies at the proper temperature in close proximity to areas where they are most likely needed.
- External digital thermometer is visible at a distance in all lighting conditions, and allows continual monitoring of the supplies’ temperature.
- Cart ships with wheels assembled, so the cart does not need to be inverted to install the wheels, thereby protecting the refrigeration components.
