Continuos Nebulizers
Better Design = Better Outcomes

Mercury Medical
Your Need…Our Innovation®
The EZflow/EZflow MAX Continuous Nebulizers have been designed to provide:

- Continuous medication delivery to patients for up to 4 hours with EZflow and 1.5 - 2 hours with EZflow MAX.
- Higher concentrations of medication, up to 9.1 mg/hr of Albuterol vs. only 6.9 mg/hr of Albuterol from competitive brands. [In-Vitro Comparison of Six Continuous Nebulizers]
- The nebulizer design with the reservoir attached directly to the mask reduces rainout and subsequent inadequate dosing issues.
- A spillproof design helps to eliminate waste and cleanup.

The advanced design of the EZflow continuous nebulizers deliver higher concentrations of medication.

### Advantages

- Eliminates the need for aerosol tubing, IV pole and bracket.
- Quick, easy setup.
- More comfortable for patient.
- Allows up to 4 hours of continuous therapy with a small volume nebulizer.
- Minimizes medication waste, ideal for ventilator patients.
- Enhances oxygen delivery.
- Eliminates cleanup and waste.
- Easy to refill.
