Face-Cradle®
Prone Support System

LEARN MORE

About

The Face-Cradle® is for use in prone position procedures offering the clinician greater visibility of the patient's face.

Advantages

- Greater visibility of patient's eyes and ET tube.
- Fully adjustable cushion set accommodates most adult head sizes and pediatric patients that are at least 37.19 kg (82 lbs.) or more.
- Simple set-up, "no waiting".
- Greater patient stability.
- MR Conditional.
- Latex-Free.
